

## Options for Client Audio Check List and Extra Services:

*It is our goal to provide the best product possible within your budget. To help us do this, please answer the following questions.*

*If you are uncertain about any of your selections, or if you would like to hear a sample of how your final record will sound, we recommend that you add a Reference Acetate sample to your order. A reference Acetate is a one-off record that you can play several times (these do wear out, but it will give you a very good taste for how your audio will sound on a record). An Acetate is recommended for any album with over 20 minutes of music on a side due to compression.*

**Please check the appropriate box in regards to your master audio files for production:**

**My Mastering Engineer has provided a vinyl specific EQ. Please do a 'flat cut'.**

*The initial file check and a second file review will be included in this service.*

*A \$50 fee will apply to the 3rd and any subsequent revisions.*

**My Mastering Engineer has provided a finished premaster, but has left some adjustment to the cutting engineer's discretion.**

**Please adjust the High Frequency and Low Frequency as follows:**

**High Frequency Options** *(apply only if the record is under 20 minutes / side)*

Please adjust the cutting level to preserve the HF content of the premaster as closely as possible, even if that makes the record a bit quieter.

OR

Please adjust the HF EQ as necessary to make the record as loud as possible.

**Low Frequency Options**

Please adjust the cutting level as necessary to preserve the bass and the stereo image of the premaster source, even if that makes the record a bit quieter.

OR

Please adjust the Bass, and the low-mid stereo image as necessary to make the record as loud as possible.

Additional Services Provided:

**Reference Acetate: \$135 + shipping**

**Captured acetate playback digital reference file: \$95**
